

Dear Shareholders,

The repairs on the canal breach have been repaired. Water is being released this morning and everyone should have water by the end of the day today!!

We would like to give a BIG THANK YOU to everyone at Sorter Construction for all of their hard work, long days and dedication to getting this breach repaired. We would also like to thank the City of Grand Junction, Redlands 360, and Grand Valley Irrigation Company for volunteering their help and/or man power to get this repaired so quickly. Lastly, we would like to thank all of our Shareholders for their patience and understanding.
